

Learn the Waltz

Assessment design and formative evaluation
for a self-paced Canvas course

W. Jordan Charles, co-designed with a classmate

WHAT THIS IS

A two-module Canvas course that teaches complete beginners the waltz: the box step, progressive basic and underarm turn, then the dance's history, health benefits and place in social life. Dance is learned by doing, and an online course can't correct anyone in the moment, so the design anticipates mistakes instead. The instructor videos show common errors next to the correct form, and learners submit a video of their own dancing for feedback.

This document is the design record: alignment map, strategies, evaluation plan, both module blueprints, and what testing with learners showed.

MY ROLE

We designed the course together. My part of the build was the video and the subject matter expert: I coordinated with the dancer who taught in our videos, filmed the lessons with him, and turned the footage into course videos with transcripts and optional captions. I also proofed the finished Canvas course.

EVALUATION AT A GLANCE

4

participants in a small-group
evaluation

2

modules tested

5–30 min

to finish a module (averages 10.75
and 14.75)

- Participants agreed the modules were well organized, clear and easy to access (from somewhat to completely agree).
- Most requested: more video of the whole dance and of partners dancing, and clearer step diagrams.
- Planned revisions: fix the common-mistakes video's title slides, correct the captions and let learners turn them off, split the videos by lead and follow, mark where each step diagram starts, and use lead and follow language throughout.

Course Goals, Instructional Goal(s)/Outcome(s), Learning Objective(s), and Assessments

Course/Training Name and Description

Learn to Dance the Waltz

Course/Training Goals (these do not have to be measurable - they are the ideal concepts or attitudes)

Gain an appreciation of the art of the Waltz

Be able to socially dance the waltz with a partner at a local dance hall, or at their house or other venue.

Alignment Map Tables: Outcomes, Objectives, and Assessments

Student Learning Outcome #1	Assessments (must identify a quiz, discussion, and assignment)
[Learning Outcome] 1. Perform the basic steps of the waltz.	Summative 1. Video submission: Perform each basic step of the waltz.
Supporting learning objective(s) 1. Identify and execute the motions of the basic box step. 2. Identify and execute the motions of the basic progressive step. 3. Execute the underarm turn with a partner.	Formative 1. Assignment: Identify mistakes from dance video. 2. Quiz : Identify and describe each of the three basic steps. 3. Discussion: Share challenges or successes.
Notes: Have the instructor explaining each of those steps as well as performing a mistake.	

Student Learning Outcome #2	Assessments
[Learning Outcome] 2. Illustrate the historical, social, and physical context of the waltz.	Summative 1. Short essay: Choose a topic (e.g., mental health benefits; history of the waltz) to

	research further and discuss the impact learning the waltz has had on their life.
Supporting learning objective(s) 1. Describe the origin and history of the waltz. 2. Discuss the historical impact of the waltz on modern dance. 3. Identify the physical health benefits of dancing based on scientific research. 4. Identify mental health benefits of dancing based on scientific research. 5. Recognize the modern social context of the waltz.	Formative 1. Discussion: Share one reference to the waltz from any of the following: a movie, a piece of music, or a social context. 2. Assignment: Contribute to the creation of a concept map on the health benefits of dancing.
Notes:	

Learn the Waltz: Instructional Strategies & High-Level Map

Instructional Strategies

Instructional Event	Strategies
Motivation	• Attention: ○ Active participation in discussions ○ Physically active-dancing ○ Variability of lessons (videos, readings, discussions) to continue interest in the course • Relevance: ○ Modern/societal connections to the waltz ○ Purpose of the course is to teach learners to dance in a real- world context ○ Providing context specific to their interest in the course ○ Allow learners to choose which method of instruction they prefer by having multiple methods available. • Confidence: ○ Learners will receive feedback from instructor on their dance steps • Satisfaction: ○ Learners will continue to enjoy learning as they have fun learning a new skill ○ Assessments will have clear rubrics, so expectations are clear
Modality & Content Presentation	• Canvas module • Instruction videos • Readings
Learner Engagement	• Physical activity linked to learning • Regular due dates • Discussions with other learners
Practice/Application	• Learners will create videos of them practicing the dance moves • Learners will apply this to the real world at events or dance activities
Assessment	• Final video of their dancing • Quizzes to identify mistakes in videos • Essay
Self-reflection	• Discussion on challenges/successes • Essay about impact of the course/the waltz on their life
Universal Design for Learning & Inclusive Design	• Videos will have captions • Text instructions, with ability to be read to those who are hard of hearing • No tables • Font choice (sans serif) • Images with alt text • Contrast • Alternate assignment for those who are not able to dance themselves

	○ Another person is actually dancing as the learner gives instructions/corrections. This shows the learner understands the steps and could be used as a alternate assessment of learning.
--	---

Module Outline:

- Overview of the course and why the waltz is awesome.
- Module 1: Dancing of the basic steps
 - Introduction of the dance steps
 - Assess with the use of video, quizzes, and discussions
 - Extension module for those who are super enthusiastic!
- Module 2: Background on the waltz
 - Readings for content
 - Videos for content
 - Assess with the use of an essay and a group concept map

Learning Resources & Materials

- Videos of dance steps, with optional extension videos for more advanced dance steps
- Readings
 - History of the waltz
 - Waltz music
 - Physical health benefits of dancing
 - Mental health benefits of dancing
 - References to the waltz in modern media

Instructional Technologies (e.g. tools for learning experience - Padlet, Kahootz, ThingLink, etc.)

- Not right now (may reassess after next week's class)
- *Not feasible for our budget, but a virtual reality environment would work so well for this, for those learning to dance with a "partner"!*

High-Level Course/Training Map

Module	Instructional Goal(s)/Outcome(s)	Learning Objective(s)	Assessments	Topics/Readings/ Learning Experiences
1	Perform the basic steps of the waltz.	Identify and execute the motions of the basic box step.	Video submission: Perform each basic step of the waltz. Assignment: Identify mistakes from dance video.	Videos of the basic dance steps.

		Identify and execute the motions of the basic progressive step. Execute the underarm turn with a partner.	Quiz : Identify and describe each of the three basic steps. Discussion: Share challenges or successes.	Videos of mistakes in dancing of the steps. Written instructions for the dance steps. Discussion
2	Illustrate the historical, social, and physical context of the waltz.	Describe the origin and history of the waltz. Discuss the historical impact of the waltz on modern dance. Identify the physical health benefits of dancing based on scientific research. Identify mental health benefits of dancing based on scientific research. Recognize the modern social context of the waltz.	Short essay: Choose a topic (e.g. mental health benefits, history of the waltz) to research further and discuss the impact learning the waltz has had on their life. Discussion: Share one reference to the waltz from any of the following: a movie, a piece of music, or a social context. Assignment: Contribute to the creation of a concept map on the health benefits of dancing.	Readings on history of waltz. Readings on health benefits of dancing. Videos on health benefits of dancing. Recordings of the music of the waltz. Discussion

Formative Evaluation Plan

For your final project peer feedback activity, you will conduct a small group evaluation with a feedback survey.

For this assignment, you will answer these questions hypothetically, as if you were going to sell your instructional design product.

Answer each question as best you can, then choose the one you think will be the most effective for your project. You may decide to do all of the phases, which is acceptable.

1. Describe how you might conduct an Expert Review of your instructional materials.
2. What subject matter expert(s) would you consult with, and what specific types of information would you hope to collect?
 3. Since we are teaching how to dance, we will be consulting with a dance instructor as our SME. For our current purposes that is a friend of Jordan's, the instructor in our videos for our course. We will make sure that our written instructions and descriptions are accurate, as well as check the historical accuracy, with the SME.
- o We would also need to consult another SME for the health benefits that we cover in our course. This SME would likely be a doctor or instructor of physical health/wellbeing.
2. Describe how you might conduct a One-to-One evaluation of your instruction.
3. How would you go about selecting a few learners to participate who are representative of your target population?
 - a. Our target population is vast, ranging in age, background, and location. For our one-on-one evaluations we would find a participant by setting up a booth at a local library or college campus. We could then have the participant go through the module while we observed.
- o What factors would you take into account in the selection process?
 - o Our participants must be able-bodied adults with access to technology and internet connection. Ideally, the participants selected would have some interest in dance but that is not necessarily a requirement for our initial subjects.
- o What specific information would you want to gather about your instruction, and what tools and methods might you use to gather that information (e.g., checklists, questionnaires, interviews, etc.)?
 - o We would like to primarily conduct an interview with the participants. We would gather information about their feelings of rigor of the course, the ease of access to instruction materials and general mobility within the module, the clarity of instruction, and a checklist of the materials included. We would also like to gather information about the challenges or confusion the participant may have faced while going through the module.

Finally, we would like to gather information in the interview about the participant's enjoyment of different aspects of the module.

3. Describe how you might conduct a Small Group evaluation of your instruction.
 4. How would you go about selecting a small group of learners to participate who are representative of your target population?
 - a. Since our participant pool is all able-bodied adults, we could gather participants from our friends, families, work colleagues, or local institutions. This would ensure a wide range of ages, backgrounds, and interests.
 5. What specific information would you want to gather about your instruction, and what tools and methods might you use to gather that information?
 - a. Given our group of participants being close contacts, we could still perform exit interviews in addition to anonymous feedback surveys. The interviews will allow us to delve deeper into any changes we made after the one-on-one instruction stage. The anonymous feedback surveys would ask similar questions as the interview in the one-on-one test of instruction, but the anonymity would assure honesty in their responses.
-
4. Describe how you might conduct a Field Test of your instruction.
 5. What instructional setting would you use for the field test?
 - a. Our instruction will be hosted on Canvas.
-
- o How would you go about selecting a group of learners to participate who are representative of your target population?
 - o This selection would likely be the most diverse and we would find our participants by posting flyers at local libraries, senior homes, community locations, and college campuses. This would allow us to gather data that is sufficiently representative of the larger population as a whole e.g., age, interest, ability.
 - o What information would you want to gather about your instruction that was not already gathered during the small group evaluation, and what tools and methods might you use to gather that information?
 - o This wider test would allow us to gather more information about the participants' interest levels, engagement, and ability to complete the instruction. This would also help us identify potential issues in the wider roll out of the course.
 - i. If your situation makes it impossible to perform a true field test, then you may want to consider your first formal presentation of the instruction as a field test. However, if you do this, leave yourself some time to revise the materials after this initial instructional session. Don't set everything in concrete.

When you have addressed each of these questions, write a summary describing which formative evaluation you chose and why.

- o We have decided that the most beneficial formative assessment for us would be the small group testing. Since our participant pool is all able-bodied adults, we could gather participants from our friends, families, work colleagues, or local institutions. This would ensure a wide range of ages, backgrounds, and interests. We chose this method so that we would be able to gather deeper feedback from individual participants in exit interviews. Given our group of participants being close contacts, we could still perform exit interviews in addition to anonymous feedback surveys. The interviews will allow us to delve into any changes we made after the one-on-one instruction stage. The anonymous feedback surveys would ask similar questions as the interview in the one-on-one test of instruction, but the anonymity would assure more honesty in their responses. Unlike the one-on-one testing stage, this stage would allow for a wider range of participants, but small enough to go through the instruction in detail with each participant after they have completed the module.

Materials needed:

Readings:

- History of the waltz (co-designer)
- Impact of the waltz upon other dances (co-designer)
- Scientific mental health (co-designer)
- Scientific physical health (co-designer)
- References to the waltz in media (co-designer)

Edit Videos from the SME:

Breaking them into separate and discrete videos for each of the following steps:

- Box step (Check)
- Progressive step (check)
- Underarm turn (check)
- Bad examples

Making a transcript for each of the videos, and potentially removing the filler words.

Make the storyboard for each of the videos Due the 27th (but have it worked a few days extra)

This is the plan for building

Module 1: Perform the Waltz Blueprint

Module Curriculum Map

Module	Instructional Goal/Outcome	Learning Objective(s)	Assessments	Topics/Readings/ Learning Experiences
1	1. Perform the basic steps of the waltz.	a. Identify and execute the motions of the basic box step. b. Identify and execute the motions of the basic progressive step. c. Identify and execute the underarm turn with a partner.	Video submission: Perform each basic step of the waltz. Assignment: Identify mistakes from dance video. Quiz : Identify and describe each of the three basic steps. Discussion: Share challenges or successes.	Videos of the basic dance steps. Videos of mistakes in dancing of the steps. Written instructions for the dance steps. Discussion

Module Outline

Page: Overview/Introduction

- Page: Basic box step
- Page: Basic progressive step
- Page: Underarm turn
- Page: Identify mistakes in video
- Discussion: Challenges and successes
- Assignment: Video submission
- Quiz: Three basic steps

Module Content

Page: Overview/Introduction

Image			
Source and file name of image (URL, folder)	Caption (if applicable)	Where to put image	Alt-text (put N/A if decorative)
green-2559003_1280.jpg	N/A	Top of the page	Couple dancing in the woods

In this module you will learn the three basic steps of the waltz. The waltz is a timeless and traditional ballroom dance performed facing a partner. It can be intimidating to learn a new dance skill, but the steps of the waltz will help you gain entry into the world of ballroom dance, and make learning other dances even easier! You will also learn to identify some of the common errors made while dancing the waltz.

Module Learning Objectives

- The materials and assignments in this module will enable you to meet the learning objectives below;
 - Identify and execute the motions of the basic box step.
 - Identify and execute the motions of the basic progressive step.
 - Execute the underarm turn with a partner.

Page: The basic box step

- See the slideshow page for the video of the basic box step
- Written out instructions for the lead and follower dancer.
 - Leader Step Instructions:
 - Start with both feet together.
 - 1. Step forward with your left foot.
 - 2. Step to the side with your right foot.
 - 3. Bring your left foot to meet your right foot (feet together).
 - 4. Step back with your right foot.
 - 5. Step to the side with your left foot.
 - 6. Bring your right foot to meet your left foot (feet together).
 - Follower Step Instructions:
 - Start with both feet together.

- 1. Step backward with your right foot.
 - 2. Step to the side with your left foot.
 - 3. Bring your right foot to meet your left foot (feet together).
 - 4. Step forward with your left foot.
 - 5. Step to the side with your right foot.
 - 6. Bring your left foot to meet your right foot (feet together).
- Protips:
 - The waltz is counted in threes: You can count as you dance (“1,2,3” “1,2,3”) to complete the six steps of the box step!
 - The temp is slow, and there is a general “rise” movement on each count and a general “fall” movement in between movements. This will create some of the feel and grace of the waltz.

Image			
Source and file name of image (URL, folder)	Caption (if applicable)	Where to put image	Alt-text (put N/A if decorative)
https://www.dancing4beginners.com/waltz/	Diagram of box steps for leader	Next to written out instructions

Page: The basic progressive step

- See the storyboard page for the video of the basic progressive step
- Written instructions for the dance steps.
 - Leader Step Instructions:
 - Start with both feet together.
 - Step forward with your left foot.
 - Slide with your right foot.
 - Bring your left foot to meet your right foot (feet together).

- Step forward with your right foot.
- Slide with your left foot.
- Bring your right foot to meet your left foot (feet together).
- Follower Step Instructions:
 - Start with both feet together.
 - Step backward with your right foot.
 - Slide with your left foot.
 - Bring your right foot to meet your left foot (feet together).
 - Step backward with your left foot.
 - Slide with your right foot.
 - Bring your left foot to meet your right foot (feet together).

Page: The underarm turn

- See the storyboard page for the video of the underarm turn
- Written instructions for the dance steps.
 - You are now dancing with a partner. In the waltz, partners stand facing each other about a foot apart.
 - The leader will place their right hand on the follower's left shoulder blade (below their arm). The follower will place their left hand on the lead's right shoulder (over their arm).
 - The leader will wrap their left hand around the follower's right hand, keeping their elbow up at shoulder height.
 - Dance the first three steps of the basic box step normally.
 - On step 4, the lead dancer will release the follower by dropping their right arm.
 - The lead dancer will raise their left arm and spin the follower clockwise towards the left.
 - The lead dancer then continues to follow the steps 4-6 of the basic box step.
 - The following dancer will continue their dance steps 4-6 but backwards instead of forwards.
- Protips:
 - The leader should shorten their steps for steps 4-6 so they do not get in the way of the follower.

Page: Common Mistakes for beginners

- <https://delta.dance/2022/04/are-you-making-any-of-these-dance-mistakes/>
- Video of the instructor

Assignment: Video submission

9 points (3 for each dance step) ; no resubmission

Instructions

- You will submit a video of you successfully completing each of the three dance steps you learned about in this module. You may film the basic box step and the basic progressive step with or without a partner, but you will need a partner to demonstrate the underarm turn.
- You may submit three individual videos (one for each dance step) or one video showing all three dance steps.
- If you are physically unable to complete the dance steps yourself, your video submission may be you instructing another individual to complete the dance steps.

Learning Objectives

- 1a: Identify and **execute** the motions of the basic box step.
- 1b: Identify and **execute** the motions of the basic progressive step.
- 1c: Identify and **execute** the underarm turn with a partner.

Assignment Rubric/Grading Criteria

	Exceeds Standard (3)	Meets Standard(2)	Below standard(1)	Not completed (0)
Execution of basic box step.	Student fully executes the basic box step, including all six substeps. Does not show any of the common mistakes.	Student mostly correctly executes the basic box step, and only 1-2 of the common mistakes are displayed	Student does not execute the steps correctly andh as multiple/freque nt common mistakes.	Not completed.
Execution of basic progressive step.	Student fully executes the basic progressive step, including all six substeps. Does not show any of the common mistakes.	Student mostly correctly executes the basic progressive step, and only 1-2 of the common mistakes are displayed	Student does not execute the steps correctly andhas multiple/freque nt common mistakes.	Not completed.
Execution of underarm turn.	Student fully executes the underarm turn with a parter. Does not show any of the common mistakes.	Student mostly correctly executes the underarm, and only 1-2 of the common mistakes are displayed	Student does not execute the steps correctly and has multiple/freque nt common mistakes.	Not completed.

Discussion: Share challenges or successes.

5 points

Instructions

- Please share one challenge and one success you have found while learning the dance steps.
- Reply to at least two other course participants.
- A reminder that we are a community and your comments to your fellow students should be encouraging and constructive.

Learning Objectives

- Create community within the course.

Discussion Rubric/Grading Criteria

- You will be graded on participation in the conversation:
 - Did you share one challenge?
 - Did you share one success?
 - Did you reply to at least two other participants?

Quiz: Waltz Steps

12 points (3 points/question)

Instructions

- Please complete the following quiz, which asks you to identify and describe each of the three basic steps.
- There will be four multiple choice questions.
- You are allowed two attempts. If you get a question wrong, there will be suggestions for where to review the content before attempting the quiz again.
- The quiz should be completed in 15 minutes.

Learning Objectives

- **1a. Identify** and execute the motions of the basic box step.
- **1b. Identify** and execute the motions of the basic progressive step.
- **1c. Identify** and execute the underarm turn with a partner.

Learning objective	Question Stem	Answer choices (mark the correct one)	Question Feedback
--------------------	---------------	---------------------------------------	-------------------

1a	When dancing the basic box step, the follower should do which of the following first?	a. Step forward with their left foot. b. Step forward with their right foot. c. Step backward with their right foot. d. Step backward with their left foot.	To review the basic box step, refer to the box step page.
1b	When dancing the basic progressive step, which of the leader's six steps happens on the "3" when counting "1,2,3,1,2,3"?	a. Feet together b. Step forward with left foot. c. Slide with right foot. d. Step backwards.	To review the basic progressive step, refer to the progressive step page.
1c	On what step of the box step do you add the underarm turn?	a. Step 1 b. Step 2 c. Step 3 d. Step 4	To review the basic box step, refer to the underarm turn page.
1a-c	Which of the following best describes the musical time signature for the waltz?	a. 4/4 b. 3/4 c. 5/4 d. 2/4	To review this information, refer to the pro tips on the basic box step page.

Module 2: Significance of the Waltz Blueprint

Module Curriculum Map

Module	Instructional Goal(s)/Outcome(s)	Learning Objective(s)	Assessments	Topics/Readings/Learning Experiences
2	2. Illustrate the historical, social, and physical context of the waltz.	a. Describe the origin and history of the waltz. b. Discuss the historical impact of the waltz on modern dance.	Essay: Write an essay on the history of the waltz, as well as the impact of the waltz on other dance styles, including more	Readings on history of waltz. Readings on health benefits of dancing. Videos on health benefits of dancing.

		c. Identify the physical health benefits of dancing based on scientific research. d. Identify mental health benefits of dancing based on scientific research. e. Recognize the modern social context of the waltz.	modern dance. Discussion: Share one reference to the waltz from any of the following: a movie, a piece of music, or a social context. This module will help you gain a deeper appreciation and understanding of the impact and importance of the waltz. You will learn the history of the waltz, how our modern world is still impacted by the waltz, and the positive health benefits you may experience as you start your dancing journey.

Module Learning Objectives

- 2a. Describe the origin and history of the waltz.
- 2b. Discuss the historical impact of the waltz on modern dance.
- 2c. Identify the physical health benefits of dancing based on scientific research.
- 2d. Identify mental health benefits of dancing based on scientific research.
- 2e. Recognize the modern social context of the waltz.

Assignment: Concept Map

(Points:9)

Instructions

- Create a concept map on the physical and mental health benefits of dancing from a scientific perspective, based on the readings provided.
- Your concept map should have a branching, tree organization (non-linear) and should show significant links and groupings.

Learning Objectives

- 2c. Identify the physical health benefits of dancing based on scientific research.
- 2d. Identify mental health benefits of dancing based on scientific research.

Assignment Rubric/Grading Criteria

	Exceeds Standard (3)	Meets Standard(2)	Below standard(1)	Not completed (0)
Organization	-Well organized -Contains at least 3 main concepts -- Appropriate number of subconcepts -Logical, non-linear format	-Somewhat organized and easy to follow -Contains at least two main concepts -Contains adequate number of sub-concepts	-Disorganized -Does not contain adequate number of main concepts or subconcepts -Linear or otherwise inappropriate map organization	Not completed.
Content	-Contains links that are labeled and clear -Linking words and groupings demonstrate understanding of the content	-Links are present but not all are labeled -Linking words and groupings are present but somewhat unclear	-Links are not present or are unclear -Linking words/groupings are not present or confusing.	Not completed.
Accuracy	-Information represented is accurate based on readings.	-Information represented is somewhat accurate based on readings.	-Information represented is inaccurate based on readings	Not completed.

Discussion: Social impact of the waltz

Instructions

- Share one reference to the waltz from any of the following: a movie, a piece of music, or a social context.
- Respond to at least one other participant.

Learning Objectives

- 2e. Recognize the modern social context of the waltz.

Discussion Rubric/Grading Criteria

- You will be graded on participation in the conversation:
 - a. Did you share one reference?
 - b. Did you respond to at least one other participant?

Essay: History of the waltz

(Points: 15)

Instructions

- Write an essay on the history of the waltz, as well as the impact of the waltz on other dance styles, including more modern dance.
- Your essay should be 500-1000 words and double spaced.
- Include at least three references, at least one of which is not from the course readings.
- Follow APA [guidelines](#)

Learning Objectives

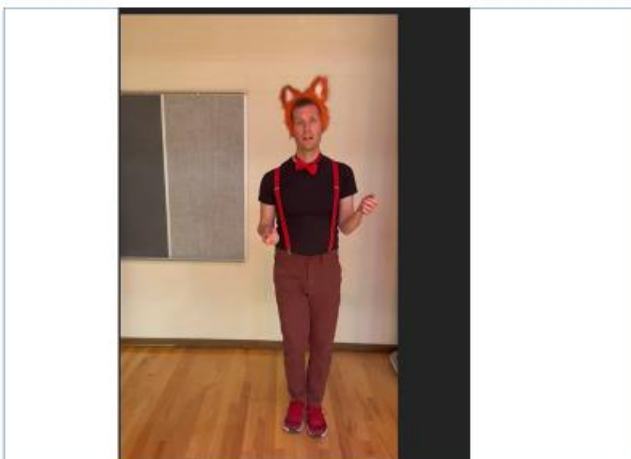

- 2a. Describe the origin and history of the waltz.
- 2b. Discuss the historical impact of the waltz on modern dance.

Discussion Rubric/Grading Criteria

	Exceeds Standard (3)	Meets Standard(2)	Below standard(1)	Not completed (0)
Content	-There is a well-focused and clear discussion of the topics. -Includes relevant details and examples.	-The discussion of the topics is clear, but not robust. -Some details are included, but one or more topics are not sufficiently supported.	-The discussion is somewhat unclear and lacks details. -Key points are not supported by examples or details.	-Inadequate discussion of the topics.

00:00:05:04 - 00:00:10:22
Adam Dimond
A lot of the time people call this the magic step.
This is also the waltz basic, so it's in a box shape.
00:00:14:20 - 00:00:21:14
Adam Dimond
Forward left foot, we go side together, and then I
go back right, side together.
00:00:21:17 - 00:00:28:01
Adam Dimond
So that's the whole thing: forward left, side
together, back right, side together.
00:00:32:19 - 00:00:53:02
Adam Dimond
For the ladies, they're going, as always, with the
right foot because they're always right. And then
they go back right side together. Forward left, side
together. So, if you notice, you're always going
back with your right foot. Side together, forward
left foot side together.

Notes	

Script:
00:00:07:28 - 00:00:28:00
Adam Dimond
Progressive basic for the man. We're just going
forward left side together and then forward right
side together. So the progressive step is in the
zigzag. And so all we're doing it one more time for
the men is we're going forward left side together,
forward right side together.
00:00:32:05 - 00:00:34:23
Adam Dimond
For the ladies, they're going to do exact opposite.
00:00:34:23 - 00:00:43:24
Adam Dimond
Starting with the right foot, they're going back right
side together. That's the first part of the 2 back left
and then side together.
00:00:48:21 - 00:01:00:16
Adam Dimond
Facing the camera. The lady step is back, right side
together, back left side together. And then they're
ready to do whatever step afterwards.

Video description: Progressive Basic for men	Video filename: Progressive Basic
Text on screen: Progressive Basic, For the men, Ladies, Ladies... Facing the camera	
Animation/Interaction:	
Notes:	

00:00:11:04 - 00:00:12:13
Adam Dimond
For the men's step for underarm: turn it, it's going to

00:00:30:01 - 00:00:30:16
Adam Dimond
I go back right side together and then forward left side together. And I pick them up right here, back right side together. So for the men, it's super simple, you're basically doing the same box step. I'm just taking my foot as I go to the side.

00:00:39:20 - 00:00:40:11
Adam Dimond
And when my feet are together, start my my arm going up, I push them under, they go under side together. I go forward. They come back right here, and then we finish the box right there.

00:00:59:12 - 00:01:00:08
Adam Dimond
For the ladies step, we go back right side together:

00:01:08:01 - 00:01:11:20
Unknown
And then my heel lifted up my arm, so I'm going to go forward left, forward right, forward left forward right, and then go forward toward the back side together back side together.

00:01:28:17 - 00:01:29:16
Adam Dimond
Facing the camera, the lady

00:01:38:16 - 00:01:42:01
Adam Dimond
is going to go back right side together forward left, right, left, right, left, right and left side together.

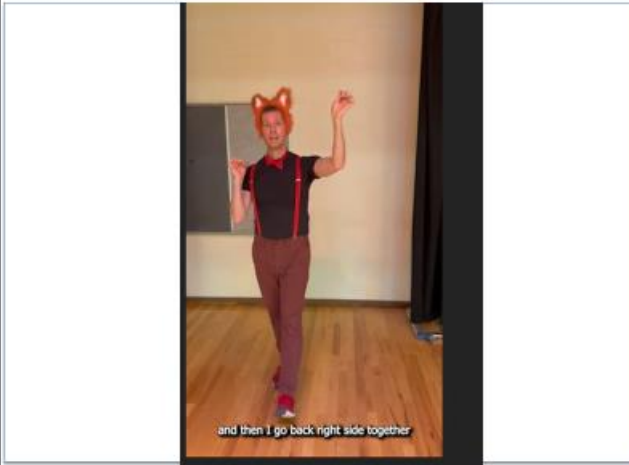

00:01:42:01 - 00:01:46:27
Adam Dimond
One more time for the lady facing the camera.

00:01:46:27 - 00:01:49:14
Adam Dimond
the goes back right

00:01:49:01 - 00:02:00:01
Adam Dimond
side together open the hand here I go forward left forward right forward left forward right forward left forward right. And then I pick up the box left side together. And now we're back to our basic for the ladies.

00:02:08:21 - 00:02:09:03
Adam Dimond
They're taking the step, going under the man

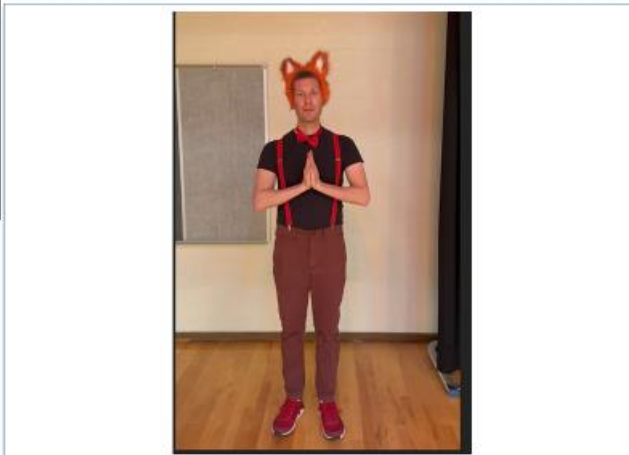

00:02:09:03 - 00:02:18:09
Adam Dimond
the step around, and then they pick up the left foot forward, and that's just the basic at the end, so there you go.

Q1 - Were there any broken links, missing images, or video clips?	Percentage	Count
No	75%	3
Yes	25%	1

What was broken? 

the title of the video

Is there anything that you have not previously been asked about or anything that you would like to say that can be improved upon? (1)

I think the language of email(s) should be changed. There should be an additional partner for the videos and a video with the entire dance. You have an assignment where you ask students to find their own example of a waltz. You could have them do that in the beginning instead?

I would simplify the amount of text that's present and put more emphasis on videos that flow well together, have good captions, and more clear audio.

I love the lab.

The "Common Mistakes" video ironically had a mistake on the slides. They were out of order.

Similar Data Compilation:

- Overall, people agreed that they felt at least somewhat competent in topics after the modules.
- People took a range of 5-30 minutes to complete each module. On average, the first module took less time (average: 10.75 minutes) than the second module (average: 14.75 minutes).
- People agreed that the modules were well organized, clear, sufficient for the learning objectives, and easy to access, with responses ranging from somewhat agree to completely agree.
- There was a divide on whether there were enough visual aids. Suggestions were more diagrams for all steps.
- While the survey results show a consensus that there is sufficient video content, every learner said verbally that they wanted more videos, specifically of the whole dance.
- The "common mistakes" video had title slides that did not function properly. This was mentioned in multiple comments and in our discussions.

Data that will influence our revisions:

The most helpful feedback was from the comments in the survey and in the discussions we had in class. There were three major areas that the comments sorted into: video, images, and other content. For our video content there was feedback to clean up a few mistakes in the videos and to include more videos of the entire waltz dance to give learners a better idea of the flow of the dance. For the images and other content, the feedback was mainly to improve learner comprehension and includes wording changes and diagram clarification.

Below are the points that will influence our revisions:

- Videos:
 - The "common mistakes" video had title slides that did not function properly.
 - The audio of the videos was sub-par and needed to be cleaned up.
 - The videos should be split into "lead" and "follower" dancing.
 - More video content with a full waltz dancing.
 - More video content of the steps with a partner in addition to the videos showing it solo.
 - Correct the captions of the video to be accurate.
 - Allow option to turn off captions.
- Images:
 - Highlight the starting point of the step diagrams to make it clearer.
 - Add more images of the steps.

- Other Content:
 - The wording of the first quiz question was a little vague.
 - Consistency in “woman/man” versus “lead/follower” language, with a preference for the gender-neutral language.
 - The language on the underarm turn page does not align with that of the box step page.
 - Allow for someone who does not have a partner to dance with on the underarm turn.

Revisions we will make:

The most common suggestions/feedback for revision were surrounding the videos and the diagrams included in the module. We will focus our revisions on these areas:

- Videos:
 - Fix the title slides on the “common mistakes” video.
 - Correct the captions on the videos. Add the ability to turn off the captions.
 - Split the videos into each dancer.
 - Add more videos (found from online sources) showing partners dancing the three steps as well as the whole dance. -Jordan
- Images:
 - Add diagrams for the progressive basic and the underarm turn.
 - Highlight the starting point in the diagrams.
- Other content:
 - Clarify language on the first quiz question.
 - Change all language to be “lead ” and “follow”.
 - Align the language on the underarm turn page with that of the box step page.
 - Add a comment on the underarm turn page and the video assignment about how to demonstrate the dance if they do not have an available partner.

Overall, the revisions are minor and will allow us to provide a better learning experience. Two pieces of feedback we will likely not be addressing are the medium of instruction and the audio of the videos. While online instruction is not ideal for dance courses, it allows those without access to in-person classes to still learn the waltz (which is the point of our modules). The audio of the video should be cleaned up, but this would be a more major revision and may require re-filming, which we do not think we will do at this time as it did not have a major impact on learner comprehension.

STARR Review: Learning the Waltz

Situation:

The goal of this project was for us to learn the instructional design process from start to finish. We designed learning modules to teach people how to dance the waltz and to appreciate the history and art of the waltz. Our goal was to design an online module for people who may not have the time or access to in-person dance instruction and to allow the learner to get feedback on their dancing from a dance instructor.

Task:

One significant challenge that our group faced was translating something typically taught with a partner in an in-person instruction method to an online module. We had to think carefully about how to design the instruction and assessments for the canvas course in a way that made sense and would accomplish the task and be as inclusive as possible. We also wanted to make sure that the learner was still a part of a dancing community and could participate in reflection with peers and gain instructor feedback.

Roles:

- Co-designer: Creation of the Canvas course, various canvas content (i.e., written instructions, assessments, rubrics, images/diagrams, online resources, links to sample waltz music)
- Jordan: Proofing the canvas content for errors and mistakes. Coordinating with SME (e.g., consulting to ensure content on canvas was accurate and appropriate; Creation of videos with SME). Transforming the instructional videos from SME into useable content to be posted on Canvas (complete with a transcript and optional CC).

Action:

We started by deciding that our online module needed instructional videos of each dance step. We agreed that ideally, the instructor for the course would be a dance instructor and that including videos of the instructor doing the steps (and not just videos we found online) would help to build a community for the learners within the course. Jordan's friend agreed to be our "instructor" for the purpose of our project, and Jordan filmed the videos with him. Jordan's co-designer then created pages for each video that included written instructions and diagrams for the dance steps to ensure that all learners had an avenue to succeed. The flow of

the first module was designed to increase the difficulty of steps until it culminated in a video submission of the completion of each step by the learner. The learner would then get feedback from the instructor on their execution of the steps. To further build community, we also included a discussion where learners would submit challenges and successes they had while learning the dance steps. Hopefully, these parts of the module will help sustain learner motivation. These actions addressed the most significant challenge we faced in creating our online learning module to teach a physical skill.

Results:

During our interviews and surveys, the compiled feedback was that the course's flow and content were clear and easy to access and that learners felt that they would be at least somewhat competent in the instruction after completing the module. This means that we would not have to do a significant overhaul of the course design and that it overall accomplishes our task. The feedback given in the interviews was that the assessments all clearly aligned with the learning objectives and that the grading criteria were clear for assignments and projects. One exception was for the first module. Since we split the assessments into either performing the dance steps or identifying them, we need to change the learning objectives to include either/or language to encompass both aspects of the assessments.

The most extensive scale revision we would make for the learning modules would be the video content and quality. It would be helpful to have a script for the instructor to use so that his instructions in the videos align with our intended tasks and assignments. We would also want to include more videos of the instructor with a partner to show the flow of the dance. The video content and quality were helpful feedback we received in the survey. The videos also had too much background noise, and we would want to refilm without people talking in the background to improve sound and image quality. We do not plan on re-filming the videos for this project or editing the sound with Adobe Premier AI unless we were to continue to maintain this course since editing the sound quality would be a considerable revision.

There are several more minor revisions we plan on making for our course. First, there was feedback asking for more diagrams of the dance steps and some commentary about the clarity of the diagrams included. We plan to find more diagrams and highlight the starting position in each diagram to show where the diagram begins. The concept map assignment will also have an visual example added for learners who are unfamiliar with concept map design. For our videos, we can make more minor changes that do not require reshooting. We will fix the "common mistakes" video's title slides that are not correctly aligned. We will also work on ensuring the videos' captions are accurate and allow the option to turn on, or off captions. We are also planning to add videos from other online sources to supplement the videos we made. The additional videos will include more partner dancing so learners can see the flow of the dance in addition to their individual parts of the dance. We will also split our current videos into each partner's dance steps instead of having one video that includes both perspectives. We will adjust the questions on the quiz slightly and make sure that all information used for the quiz will

be clearly visible on the instructional pages and all questions are clearly aligned with our learning objectives. For the essay assessment we will clarify the instructions for the assignment to include a specific timeline to follow and align the rubric to the new instructions. Finally, and perhaps most importantly, we will adjust all language to align with the inclusive “lead” and “follow” rather than the ladies and gentlemen language often used in the dance community. This includes adjusting our explanation of the terminology used in our modules on the first instructional page for the box step, as well as all alt text for images included.

Reflect:

- Co-designer: I learned a great deal while completing this project. Having taught for several years, learning objectives have been a part of my life for a while but I was never very focused on specifically matching them to the assessments I created. The same goes for creating standardized rubrics. I typically created these after I designed and assigned a project, but creating the rubric through the lens of design and alignment to objectives has changed my perspective on their purpose. Something else I have never really had to do in my teaching experience was determine my audience, as I knew who/what age I would be teaching. Creating personas for my learners was interesting and something that I kept referencing as I was designing the content for the modules. It was more important for my design process than I expected when I first created my personas.
- Jordan: I learned quite a bit during this project. I haven’t taught many people and mainly just listen to instructions or simply say what I want. I did a little bit of teaching as an undergraduate for extracurricular activities, but never a formal class. Being able to create learning objectives, and then rubrics and exams based upon those learning objectives was unique. Working with another partner and coordinating between a subject matter expert and my partner was also a new thing, as being able to work with different viewpoints, balance out opinions and come to agreements with people. Lastly, coming up with personas that may or may not fit the ideal role was an important aspect, as we can’t always assume that the people taking our class fit into a cookie-cutter mold.
